

Tubes and Fittings

FOR HIGH PURITY GAS SYSTEMS

We offer a complete program of
tubes and fittings for high purity gassystems

2020

PQE

Super clean Tubes and Fittings for transport of Ultra High Purity Gases used in semiconductor and microelectronic industry. Other typical applications include high purity oxygen and hazardous gases. The products are capped and packed in double polyethylene bags to guarantee quality from delivery to point of use. *Read more on page 4.*
COLOR OF LABEL: 

CQE

Tubes and Fittings with defined surface roughness for transport of High Purity Gases used in laboratories, calibration instruments and transport of pure oxygen and CFOS. Tubes and Fittings are manufactured, cleaned and packed in controlled processes to guarantee the same quality from delivery to point of use. *Read more on page 20.*
COLOR OF LABEL: 

CQ

Clean tubes produced for transport of High Purity Gases used in laboratories, calibration instruments and transport of pure oxygen and CFOS. Tubes are manufactured, cleaned and packed in controlled processes to guarantee the same quality from delivery to point of use. *Read more on page 38.*
COLOR OF LABEL: 

CQM

High Purity Tubes and Fittings with guaranteed hydrocarbon content < 2,5 mg/m² in accordance to HB 370 for transport of medical gases in hospitals. Products are cleaned and inspected in controlled processes to guarantee stable and high quality, focusing on patient safety in hospital environment. *Read more on page 42.*

PQE ELECTROPOLISHED TUBES AND FITTINGS

Stainless steel tube system for Ultra Clean Gassystems

CALAMO PQE products are suitable for transport of Ultra High Purity Gas Systems in semiconductor and microchip manufacturing using corrosive or hazardous gases. Other examples are high purity oxygen. Tubes and Fittings are electropolished, clean room treated and packed to guarantee a high quality until the final installation.

Products

Stainless steel tubes, tees, elbows, reducers and caps.

- Outside diameter: 6,00 – 152,40 mm
- Available as coaxial system

Standard

Steel grade: EN 1.4404/1.4435/1.4432, ASTM 316L

Seamless: EN 10216-5 TC1, ASTM A269/A270, ASME SA213

Welded: EN 10217-7 TC1, ASTM A270/A269, ASME SA 249

Tolerances: ISO 1127 D4/T3, D3/T3, D2/T3, D2/T2, ASTM A269/A270

Specification

- Raw material
 - Seamless and welded tubes and fittings
 - Bright annealed
- Electropolishing
 - Electropolished inside in accordance with SP3-039/40
- Surface roughness
 - Ra inside 0,25µm (10µinch)
- Cleanroom treated in accordance with SP3-060
 - Class ISO 4/5, FED 209 10/100
 - Rinsing with de-ionized water 18 MΩcm
 - Dried with hot nitrogen gas
 - End capped and protected in double polyethylene bags

Certificate

CALAMO is certified in accordance with the following system (quality) ISO 9001, (environment) ISO 14001 och (Occupational healthy and safety) OHSAS 18001.

Manufacturing

- Raw material manufactured only from selected and approved suppliers according to CALAMO specifications.
- Electropolishing processes and machines are developed and built with CALAMO technology.
- Final cleaning with operation inside clean room using 70° C hot de-ionized water. Drying with filtered heated nitrogen.
- Each sleeve is marked with a unique label that can be traced back to the certificate.
- A clean nylon film is placed over each end prior to ends are capped. Finally products are packed in double polyethylene bags.

Advantages

- CALAMO has a unique quality and service due to an integrated value chain.
 - Receiving inspection and a large raw material stock to safeguard stable deliveries and short project lead time.
 - Electropolishing, cleaning, packing and inspection is conducted in the same facility creating stability in quality and short lead time.
 - Daily deliveries from our stock of finished products.
 - PQE products are end treated and ready for orbital welding.
 - Direct sales from mill for quick service and short response time.

CQE CLEAN TUBES AND FITTINGS

Stainless steel tube system for High Purity Gas Systems

Calamo stainless steel tube system CQE is manufactured for transporting high purity gases for laboratories, calibration gases or transport of oxygen. The manufacturing process is very controlled to guarantee a stable quality from gas source to point of use.

Products

Stainless steel tubes, tees, elbows and reducers.

- Outside diameter: 6,00 – 152,40 mm

Standard

Steel grade: EN 1.4404/1.4435/1.4432, ASTM 316L

Seamless: EN 10216-5 TC1, ASTM A269/A270, ASME SA213

Welded: EN 10217-7 TC1, ASTM A270/A269, ASME SA 249

Tolerances: ISO 1127 D4/T3, D3/T3, D2/T3, D2/T2, ASTM A269/A270

Specification

- Manufactured in accordance with SP3-007
- Inside surface roughness Ra 0,4 - 0,6 µm
- In accordance with ASTM G93

Certificate

CALAMO is certified in accordance with following systems (quality) ISO 9001, (environment) ISO 14001 och (Occupational healthy and safety) OHSAS 18001.

Manufacturing

- Cleanliness achieved through advanced surface treatment and packing technique.
- Final rinsing always using deionized water.
- Tubes are dried with nitrogen from cryo tank.
- Individual surface control of cleanliness and surfaces.
- CQE-products are sealed with polyethylene caps and packed in seales polyethylence sleeve.

Advantages

- Tubes and Fittings are cleaned to transport high purity gases without interference with the process.
- High purity tubes and fittings are protected from contamination.
- Products have full traceability from steel customer to melt. Material certificate according to EN 10204 3.1.
- Each sleeve is marked with a unique label that can be traced back to the certificate.
- The products fulfill the requirements according to PED 2014/68/EU and AFS 1999:4. Tees are optional.
- A large stock of finished tubes and fittings safeguard short lead times and quick installations.
- CQE is prepared for orbital welding.
- CQE tubes with OD below 6-18 mm can be bent on-site with same cleanliness and durability.
- A large stock of finished tubes and fittings guarantee high service and short lead times.

CQ CLEAN TUBES

Stainless steel tube system for High Purity Gas Systems

Calamo stainless steel tube system CQ is manufactured for transporting high purity gases for laboratories, calibration gases or transport of oxygen. The manufacturing process is very controlled to guarantee a stable quality from gas source to point of use.

Products

Stainless steel tubes

- Outside diameter: 6,00 – 152,40 mm

Standard

Steel grade: EN 1.4404/1.4435/1.4432, ASTM 316L

Seamless: EN 10216-5 TC1, ASTM A269/A270, ASME SA213

Welded: EN 10217-7 TC1, ASTM A270/A269, ASME SA 249

Tolerances: ISO 1127 D4/T3, D3/T3, D2/T3, D2/T2, ASTM A269/A270

Specification

- Manufactured in accordance with SP3-007
- Option: Surface roughness
- In accordance with ASTM G93

Certificate

CALAMO is certified in accordance with following systems (quality) ISO 9001, (environment) ISO 14001 och (Occupational healthy and safety) OHSAS 18001.

Manufacturing

- Cleanliness achieved through advanced surface treatment and packing technique.
- Final rinsing always using deionized water.
- Tubes are dried with nitrogen from cryo tank.
- Individual surface control of cleanliness and surfaces.
- CQ-products are sealed with polyethylene caps and packed in seales polyethylene sleeve.

Advantages

- Tubes are cleaned to transport high purity gases without interference with the process.
- High purity tubes are protected from contamination.
- Products have full traceability from steel melt to customer. Material certificate according to EN 10204 3.1.
- Each sleeve is marked with a unique label that can be traced back to the certificate.
- The products fulfill the requirements according to PED 2014/68/EU and AFS 1999:4. Tees are optional.
- A large stock of finished tubes safeguard short lead times and quick installations.
- CQ is prepared for orbital welding.
- CQ tubes with OD below 6-18 mm can be bent on-site with same cleanliness and durability.
- A large stock of finished tubes and fittings guarantee high service and short lead times.

CQM MEDICAL

Stainless steel tube system for Medical Gas Application

Calamo stainless steel tube system CQM is manufactured for transporting medical gases in hospitals. The manufacturing process is very controlled to guarantee a stable quality focusing on patient safety and hospital environment.

Products

Stainless steel tubes, tees, reducers, elbows in stainless steel including adaptors to copper.

- Outside diamter: 6,00 – 139,70 mm

Standard

Steel grade: EN 1.4404/1.4435/1.4432, ASTM 316L

Seamlesst: EN 10216-5 TC1, ASTM A269/A270, ASME SA213

Welded: EN 10217-7 TC1, ASTM A270/A269, ASME SA 249

Tolerances: ISO 1127 D4/T3, D3/T3, D2/T3, D2/T2, ASTM A269/A270

Specification

- CQM Medical
 - Surface treatment according to SP6-064
 - Hydrocarbon content < 2,5 mg/m²
- In accordance with ASTM G93

Certificate

CALAMO is certified in accordance with following systems (quality) ISO 9001, (environment) ISO 14001 och (Occupational healthy and safety) OHSAS 18001.

Manufacturing

- Cleanliness achieved through advanced surface treatment and packing technique. Analysis of surfaces according to SS-EN 723.
- Final rinsing always using deionized water.
- Tubes are dried with nitrogen from cryo tank.
- CQM-produkts are sealed with polyethylene caps and packed in seales polyethylence sleeve.

Advantages

- Tubes fulfills SIS hand book 370 safety standard applicable to medical gas applications and ISO 7396-1 Medical gas pipe line systems.
- High purity tubes and fittings are protected from contamination.
- Products have full traceability from steel melt to customer. Material certificate according to EN 10204 3.1.
- Each sleeve is marked with a unique label that can be traced back to the certificate.
- The products fulfill the requirements according to PED 2014/68/EU and AFS 1999:4. Tees are optional.
- A large stock of finished tubes and fittings safeguard short lead times and quick installations.
- CQM Medical is prepared for orbital welding.
- CQM tubes tubes with OD below 6-18 mm can be bent on-site with same cleanliness and durability.
- Products fulfills Locum R3 guidelines for medical gases in Sweden.

Thanks to high quality products, meticulous documentation and material traceability in place, Calamo was the first approved European supplier of high purity tubular products to the No.1 world microprocessor manufacturer. Our chemists and high qualified specialists, continuously develop new solutions to help our customers becoming better. In spacious and technically advanced facilities, we create stable and high quality products.
